

Python data structure - list

to define a list:

method 2:

```
myList = ["first", "second"] # This creates a list containing some strings
```

Python data structure - list

To print out the items from a list

```
myList = ['tic', 'tac', 'toe']
```

```
myList[0]
```

```
for item in myList:  
    print(item)
```

OR

```
for i in range(len(myList)):  
    print(myList[i])
```
