

Python conditional statements

```
num = int(input("Please input an integer: "))
```

```
if num > 0:
```

```
    print(num, " is a positive number")
```

```
else:
```

```
    print(num, " is a negative number")
```

Python conditional statements - elif

```
num = int(input("Please input an integer: "))
```

```
if num > 100:
```

```
    print (str(num) + " is larger than 100")
```

```
elif num > 10:
```

```
    print (str(num) + " is larger than 10")
```

```
else:
```

```
    print (num , " is not larger than 10")
```
