

Pseudo-Code : counting down to 0 using loops

OUTPUT “Please give an integer to start the counting down: “

myNum <- USERINPUT

while myNum >= 0:

 myNum = myNum - 1

OUTPUT myNum

The 100 game

- two players taking turn to input a whole number between 1 and 10
- add all inputs together
- first player reached 100 is the winner

your solution must be:

- ask each player's name
- check number input (is integer and between 1 and 10)
- decides winner
- output winner's name
