Python while loops

```python
num = int(input("Please input an integer: "))

while num >0:
    num = num -1
    print(num)
```

Python while loops starter

1. Go to open drive G:\Computing\Y12\AQA-CS-AS
2. copy over the file: loops-try.py
3. Run it with an input 4 when prompt
4. the output should be like:

```
Give me a whole number below 12 4
4x1=4
4x2=8
4x3=12
4x4=16
```

6. Modify the code, so it output :

```
45x4=180
45x3=135
45x2=90
45x1=45
```
