github for your theory notes

1. open the terminal on the virtual box
2. go to home drive: **cd Home\ Drive**
3**. git clone https://github.com/digixc/Test-AQA.git**
4. **ls** you should see a directory/folder has the name *Test-AQA*
5. If you have made a repo last time for your theory notes, move the content inside Test-AQA to your own repo. **mv Test-AQA/* yourOwnRepoName**
4. Since now you have made changes to your repo, you need to commit those to your repo on github. Using in the following commands:
   cd yourRepo_dir
   git add .
   git commit -m 'added AQA theory notes skeleton''
   git push origin master
