Objectives

1. Create a markdown theory notes for your AQA AS computer science

2. get familiar with using markdown

3. get familiar with using github

github for your theory notes

1. open the terminal on the virtual box
2. go to home drive: **cd Home\ Drive**
3**. git clone https://github.com/digixc/Test-AQA.git**
4. **ls**   you should see a directory/folder has the name *Test-AQA*
5. If you have made a repo last time for your theory notes, move the content inside Test-AQA to your own repo.   **mv Test-AQA/* yourOwnRepoName**
4. Since now you have made changes to your repo, you need to commit those to your repo on github. Using in the following commands:
   cd yourRepo_dir
   git add .
   git commit -m 'added AQA theory notes skeleton''
   git push origin master
