Python data structure - list

To find out how many items in a list, use the len function

myList = ['Abi', 'Sam', 'David']
len(myList)

To add an item to a list:
myList.append("Julian")

To remove an item to a list:
myList.remove("Julian")

The Hangman game flow

1. **pick a random word from a list**
2. **display the word or partially guessed word**
3. **get user's guessed letter**
   1) check for valid input
   2) check if guessed the correct letter

4. **Check if the game has been won**
